Summary

B.Tech Information Technology student with backend development internship experience building RESTful APIs and database-driven applications using Node.js and Express.js. Strong foundation in Java, SQL, Object-Oriented Programming, and Data Structures & Algorithms. Passionate about software development and continuously improving problem-solving and backend development skills.

Technical Skills

Languages: Java, C, SQL
Backend: Node.js, Express.js, REST APIs
Core CS: OOP, Data Structures, Algorithms
Databases: PostgreSQL, MySQL
Cloud & Infra: AWS S3, AWS EC2, IBM Cloud(Basics)

Experience

Backend Development Intern — InnerWhispers Wellness LLP · Remote June 2026 – Present

- Backend implementation and enhancement of **4 healthcare applications** (Doctors Dashboard, Appointment Booking System, NAU Care Connect Portal, and NAU Peer Support) using **Node.js, Express.js, MySQL, and REST APIs**.
- Designed and implemented **17+ RESTful APIs** for doctor management, patient records, appointment scheduling, booking workflows, session management, and portal functionality.
- Integrated **Email Authentication (OTP)**, email notifications, and the **Razorpay Payment Gateway**, enabling secure user verification, automated communication, and online appointment payments.
- **Refactored** the appointment booking system into a **modular and reusable backend architecture** using controllers, services, middleware, and route-based design, improving maintainability and scalability.
- Implemented authentication, input validation, centralized error handling, request logging, rate limiting.

IBM SkillsBuild Intern — AI & Cloud Technologies | Edunet Foundation · Remote July 2025 – Aug 2025

- Worked on machine learning workflows using Python and IBM Watsonx.ai.
- Performed data preprocessing, model training, and evaluation using cloud-based AI tools.
- Collaborated with mentors and team members to develop AI-based solutions.

Projects

EduSync – AI-powered Institutional Document Assistant

- Collaborated in a **4-member team** to develop an AI-powered assistant using **FastAPI, PostgreSQL** and **Docker**.
- Developed backend APIs for ingesting **PDF, HTML, and Excel** documents, implementing document chunking, content hashing, and vector search for Retrieval-Augmented Generation (RAG).
- Contributed to frontend integration, database development, testing, and Git-based collaboration, improving the overall functionality and reliability of the application.

Intelligent Document Querying System *(Python, AWS Bedrock, Amazon S3)* GitHub

- Completed an end-to-end RAG application as the **AWS AI Engineer Nanodegree capstone**.
- Provisioned AWS infrastructure using Terraform and integrated Amazon Bedrock, Amazon S3, and Aurora PostgreSQL.
- Implemented knowledge base querying, model invocation, and document ingestion using the provided project template.
- Built a Streamlit interface for document upload and natural language querying.

Data Structures & Algorithms Visualizer *(TypeScript, PostgreSQL, Tailwind CSS)* Live | GitHub

- Collaborated on a live platform for visualizing data structures and algorithms.
- Implemented user registration and authentication using Supabase Authentication.
- Developed interactive visualizations for arrays, linked lists, and tree data structures.

Education

Engineering College, Ajmer — B.Tech in Information Technology | *CGPA: 9.26/10.0* 2023 – 2027

Certifications

AWS ML Foundations — AWS (2025) | Intro to GenAI with AWS — Udacity (2025) | Getting Started with AI — IBM (2025) | Python Essentials 1 & 2 — Cisco (2025)

Achievements

- Solved **150+** Data Structures and Algorithms problems on **LeetCode** using Java.
- Selected for the AWS AI & ML Scholars Program.
