Ajmer, RJ | shubhamsharma86900@gmail.com | +91-8690097812 | Portfolio | LinkedIn | GitHub

Summary

Backend-focused Software Engineer with experience building production-grade REST APIs, authentication systems, and database-driven applications. Currently developing healthcare platform backend services at **InnerWhispers Wellness LLP**. Built projects spanning **AWS Bedrock RAG**, **React Native AI applications**, and full-stack systems using **Node.js**, **PostgreSQL**, and cloud technologies. Selected among the **Top 1,500 of 50,000+** AWS AI & ML Scholars.

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, SQL	Databases: PostgreSQL, MySQL, Aurora Serverless
Backend: Node.js, Express.js, Prisma, REST APIs	Cloud & Infra: AWS, Terraform, Docker, IBM Cloud
Frontend & Mobile: React, React Native, Tailwind CSS, Vite	AI & Concepts: RAG, LLMs, Vector Search, Microservices

Experience

Backend Development Intern — InnerWhispers Wellness LLP · Remote	June 2026 – Present
- Built authentication and patient-management backend services using Node.js and Express.js, enabling secure access to healthcare workflows across multiple user roles. - Developed REST APIs for login, profile management, password recovery, and patient CRUD operations, streamlining frontend-backend integration for core platform modules. - Designed relational database schemas and session-management structures, improving data consistency and supporting scalable user and patient record management.	
IBM SkillsBuild Intern — AI & Cloud Technologies Edunet Foundation · Remote	July 2025 – Aug 2025
- Trained and deployed a Snap Random Forest classifier on IBM Watsonx.ai — 95.8% accuracy, outperforming logistic regression baseline by ~12pp on a government benefit applicant dataset. - Designed a decision support tool cutting manual applicant review time by 70% — removing the human classification bottleneck from a government benefit distribution pipeline.	

Projects

Intelligent Document Querying System (AWS Bedrock · RAG · Terraform · Production)	GitHub
Stack: AWS Bedrock, Terraform, Aurora Serverless PostgreSQL, S3, Python, Streamlit. - Built an end-to-end RAG pipeline — AWS Bedrock Knowledge Bases, Aurora Serverless PostgreSQL, S3 — delivering sub-second natural language search over multi-page technical PDFs. - Provisioned full AWS infrastructure via Terraform across two modular stacks (VPC, NAT, Aurora Serverless, S3, Bedrock KB, IAM) — reproducible end-to-end from a single terraform apply. - Implemented prompt validation via a Bedrock model pre-check — filtering irrelevant queries before KB invocation — and tuned temperature and top_p to balance retrieval precision with response diversity.	
Data Structures & Algorithms Visualizer (Live · 60 FPS · Full-Stack · 20+ Algorithms)	Live GitHub
Stack: React, TypeScript, Node.js, Express, Prisma, PostgreSQL, Zustand, Tailwind CSS, SVG, Canvas. - Built a custom Animation Engine separating algorithmic logic from UI rendering, maintaining stable 60 FPS on O(n²) sorts across 100+ element arrays. - Architected a full-stack system using Node.js, Express, Prisma, PostgreSQL, Jest, and GitHub Actions CI/CD, supporting 20+ algorithms while reducing worst-case re-renders by 30% through Zustand state management.	
LaterLens (AI Screenshot Organizer · React Native · Vector Search)	GitHub
Stack: React Native, TypeScript, Supabase (pgvector), Python, OCR, LLM Embeddings. - Engineered an automated screenshot categorization system achieving 95% classification accuracy and delivered sub-second semantic search across thousands of images, reducing retrieval time by 80% using OCR, LLM analysis, and vector embeddings.	

Education

Engineering College, Ajmer — B.Tech in Information Technology CGPA: 9.2/10.0	Sept 2023 – Sept 2027
AWS AI & ML Scholars — Future AWS AI Engineer Nanodegree Udacity & AWS	Aug – Nov 2025
Selected: Top 1,500 of 50,000+ global applicants · ML, GenAI, SageMaker, Bedrock, Terraform	

Certifications

AWS ML Foundations — AWS (2025)	Intro to GenAI with AWS — Udacity (2025)	Getting Started with AI — IBM (2025)
Python Essentials 1 & 2 — Cisco (2025)
